

ADAGIO - ROUND

Make bathing difficulties a thing of the past with the Adagio. Combining practicality with ease of use, the compact design makes excellent use of limited space, whilst the integral seat allows you to bathe upright and still enjoy a good soak.

An inbuilt recess allows the door to be opened fully for optimum access, and with a slip-resistant base and no hazardous catches or operating devices, you can bathe safely with peace of mind.

This bath can be surface mounted using the height adjustable feet and plinth or, because of the specially designed frame, it can be installed directly into the joists, providing a possible threshold of just 45mm.
