

## DELTA

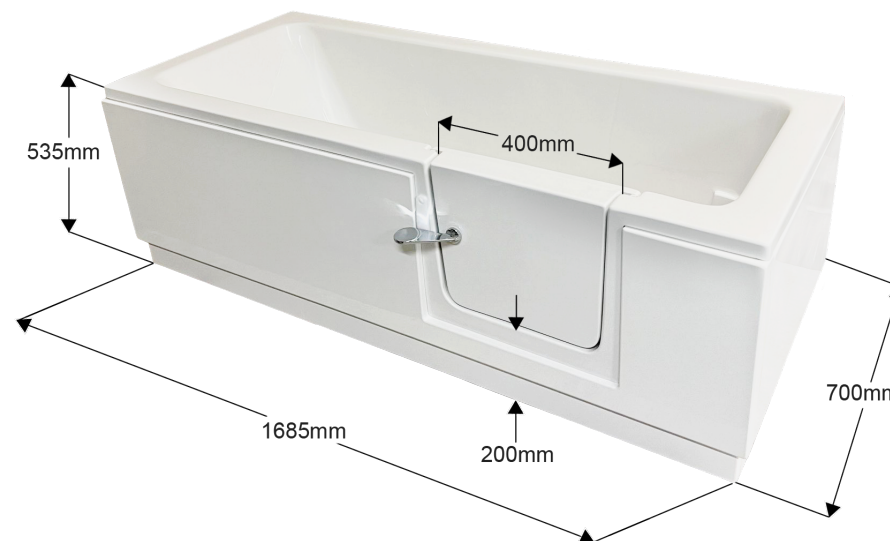

New for 2023 - Discover the versatility of the Delta.

The Delta is our new accessible bath featuring a door with no integrated seat.

It serves as a modern alternative to the traditional bath, catering for everyone in the family.

In addition to its functional purpose, the Delta's modern aesthetic and sleek lines make for a bath that will work in any style of bathroom.

This bath can be surface mounted using the height adjustable feet and plinth or, because of the specially designed frame, can be installed directly into the joists, providing the lowest possible threshold.

## ADDITIONAL INFORMATION
